## THE NEW BRUNSWICK SEED POTATO INDUSTRY

New Brunswick has a world-wide reputation as a consistent supplier of high quality virus-tested seed potatoes. This reputation has been achieved through the co-ordinated efforts of growers, industry representatives, Provincial and Federal Governments. Working together, they have developed a number of methods and practices which assure a high standard of seed potato quality.

The Bon Accord Elite Seed Potato Farm provides the basic stock to the industry. The Farm is operated by the N. B. Department of Agriculture. Stringent disease control measures and careful management practices are routinely followed. Potatoes produced on the Farm are monitored for potato viruses PVX, PVS, PVA, PLRV, PSTV, and bacterial ring rot. In addition, samples are sent to the Florida winter test each year. This rigorous monitoring assures that only superior quality seed enters the N. B. seed system.

An additional program has been integrated into the production system at Bon Accord. Potato plantlets are produced in test tubes from meristems of virus-free plants. These plantlets are then grown in a greenhouse and the tubers they produce are entered into the field production system on the Farm. This meristem plantlet system provides a means of rapidly bulking new varieties as they are required by the industry.

Foreign delegations tour the Province each year. They visit a number of seed potato growers as well as the Provincial Seed Farm and have an opportunity to gain information on all seed production projects. They observe the high standards maintained throughout the industry and review the management practices followed by seed growers.

One of the visits which receives a lot of attention is the Variety Screening and Multiplication Project. A wide range of varieties or seedlings are maintained at this site. It allows for an early evaluation of the market potential in New Brunswick of new seedlings or varieties and allows seed growers to gain information on production practices prior to introducing a new variety on their farms. It is a co-operative effort of the N. B. Department of Agriculture and the N. B. Seed Potato Growers Association.

The Potato Disease Eradication Act provides the legislative authority to eradicate several named potato diseases from the Province. Any potato production over 1/4 hectare must be grown from Certified or higher class seed. Inspection of growers' premises and disinfection of storage and equipment may be

required to assure disease eradication. In addition, the Act provides for the establishment of seed potato production areas. The growers in these areas agree to follow rigorous disease control practices. Disinfection units, vehicle dips, and weigh scales are located at the entrance to an area. These facilities provide disinfection services for trucks and containers and ensures that seed is packed and transported under sanitary conditions.

New Brunswick seed potato growers demonstrate a dedication to high quality production standards. The N. B. Seed Potato Growers Association, formed in 1977, is active in the development and implementation of programs designed to ensure enforcement of disease control and eradication programs. It sponsors seminars and tours on topics of grower interest and administers the Aphid Alert Service and Disinfection Service.

This grower dedication, backed up by strong Provincial and Federal Government commitment, results in the production and delivery of seed potatoes with a high quality standard known around the world.

## SEED POTATO CERTIFICATION IN CANADA

Seed Potato Certification in Canada is the responsibility of Agriculture Canada. This results in a uniform system of seed certification for the entire country. The system is described as a Flush Through System. The number of field grown generations is limited to five--Elite I, Elite II, Elite III, Foundation and Certified. There is an automatic downward movement of seed, one class each year. At the end of the years the seed has moved out of the Certification System.

Elite I seed is produced from Pre-Elite tubers. Pre-Elite tubers are tested for bacterial ring rot, potato spindle tuber viroid and the common potato viruses. Provided that no disease is detected, these tubers enter the Certification System as Elite I. Seed passes down through the system each year until it reaches Certified class When Certified seed is planted, it cannot be recertified as seed. The crop produced is used for table or processing.

Elite I and Elite II seed must be inspected at least 3 times with a zero disease tolerance. Elite III seed must have three field inspections with a maximum disease level of 0.25% total blackleg, wilts and viruses. Foundation and Certified seed must have two field inspections with a maximum of 0.25% for Foundation and 2% total blackleg, wilts and viruses for Certified.

Seed potatoes must be graded and sized prior to sale. the size classes are as follows:--

Round Varieties

A Size - 4-12 ounces or 113-340 grams

B Size - 1 1/2-4 ounces or 42-113 grams

Long Varieties

A Size - 4-16 ounces or 113-454 grams

B Size - 1 1/2-4 ounces or 42-113 grams

Contract Size - any size specified by the purchaser

Tubers of all seed classes must meet the Grade standard specified below.

| 1. Disease or Defect | Percentage |
|---|---|
| Soft rot or wet breakdown | 0.0 |
| Dry rot including late blight | 1.0 |
| Scab and Rhizoctonia | |
| a) slight | 10.0 |
| b) moderate | 5.0 |
| Stem-end discolouration due to topkilling, frost, heat or drought with penetration from 6 millimeters to 13 millimeters. | 4.0 |

2. No tuber in any lot of seed potatoes shall show symptoms of bacterial ring rot.

3. The percentage of tubers in a lot of seed potatoes of any grade showing symptoms of viruses including leafroll necrosis shall not exceed the percentage permitted by field inspection for all viruses for that grade.

4. The percentage of tubers in a lot of seed potatoes of any grade that are of a variety foreign to the variety of which the lot generally consists shall not exceed the percentage permitted by field inspection for that grade.

5. The number of malformed or externally damaged tubers in any lot of seed potatoes shall not exceed two percent (2%) of the number in the lot.

6. The number of tubers in the aggregate affected by diseases and defects, not including slight scab, slight Rhizoctonia and stem-end discolouration shall not exceed five percent of the total number of tubers in any lot of seed potatoes.

7. All tubers except two percent in any lot of seed potatoes shall be firm and well shaped.

Elite seed classes must be grown on a Provincial Seed Farm or by a selected seed grower. The Province of New Brunswick operates an Elite Seed Potato Farm at Bon Accord. Its purpose is to produce high quality seed for the New Brunswick seed potato industry under the most rigid phytosanitary conditions.

New Brunswick has three classes of seed growers:--

| Type of Seed Grower | Class of Seed Produced |
|---|---|
| Elite seed growers | Pre-Elite, Elite I, Elite II Elite III and Foundation |
| Recommended seed growers | Elite III, Foundation and Certified |
| Other seed growers | Foundation and Certified |

The Elite and Recommended growers are eligible to receive seed from Bon Accord at the Elite II class. In addition, the Elite seed growers obtain Pre-Elite, eye-indexed tubers, as well as limited quantities of Elite I from Bon Accord to supplement their own production.

To supplement the field inspection program, the Food Production and Inspection Branch, Agriculture Canada, operates the Florida Seed Potato Test and a laboratory post harvest testing program.

The rigid phytosanitary standards imposed by this Certification System and enforced by the Officers of Food Production and Inspection (F. P. & I.) assure the production of a consistently high quality seed crop.

## POTATOES CANADA

Potatoes Canada is an organization representing all segments of the potato industry in New Brunswick and Prince Edward Island. Its primary role is to expand the off-shore exports of seed potatoes and to co-ordinate the efforts of the Federal and Provincial Governments together with the export industry to achieve this objective.

Overseas trials are essential to evaluate variety performance in foreign countries. Through such variety trials, Potatoes Canada attempts to identify and advance varieties both at home and abroad which will satisfy demand and will improve the variety mix which Canada has to offer. Such trials led to the early realization that many markets demanded yellow as well as white fleshed varieties. To fulfil an immediate demand, the Canadian industry was urged to acquire and introduce foreign bred varieties, including American releases, to meet the yellow flesh as well as other market requirements.

Stronger efforts are also being made in the National Breeding Program to fulfil the requirements of the off-shore markets. Yukon Gold is the first Canadian bred yellow fleshed variety to be certified for sale as seed in Canada. Other Canadian bred yellow fleshed seedlings are rapidly being advanced for certification. In addition, efforts are now being made to select varieties adapted for earlier shipping.
